A fantastic italian story

1971

Marco Arata and Attilio Rapallini, true sea lovers just barely into their twenties, start small-scale production of pronged heads and spear heads from scratch and SEAC (Subacquea E Affini Carasco) is founded.

1975

The first logo is created and the first official SEAC catalog is published.

1980

Production of the first spring-loaded and sling spearguns starts.

1982

SEAC reaches another milestone with the manufacture of new wetsuits, including the legendary Privilege.

1985

The development and production of the legendary Asso speargun mark yet another important step for SEAC and the spearfishing world as a whole.

1988

Stefano Makula, a SEAC sponsored athlete, reaches an incredible depth of -102 meters in variable weight freediving on the island of Giannutri and thus becomes world champion.

1989

Production expands with the new SEAC BCDs, including the Jump model.

1990

SEAC inaugurates its new plants in San Colombano Certenoli.

1993

A new adventure starts with in-house production of regulators.

1995

The iconic Extreme mask is born!

1999

In April, Nicola Brischigiario breaks a new scientific world record in distance freediving under ice (85m in 1'40'') on Lake Verney, using SEAC equipment.

2001

SEAC designs and manufactures a revolutionary BCD: the Pro2000.

2004

The second generation of SEAC arrives when Daniele Arata joins the company.

2006

SEAC further expands its product range and divides it into different lines: SCUBA, Snorkeling, Freediving, Swimming.

2007

The Icaro BCD wins the RedDot Product Design Award in 2007.

2008

SEAC has a new in-house workshop built, dedicated to regulators, with state-of-the-art ANSTI machines and new-generation technologies.

2010

New models of the SCUBA and freediving fins are developed and produced and expand the SEAC range even further.

2012

Marco Maestri joined SEAC and launched the branch in the United States, SEAC USA Corp. in the City of New York. SEAC USA relocated to Miami in 2015.

2014

After meticulous research, SEAC develops its first range of LED torches, including the renowned "R" series.

2017

Design and manufacture begins on the first full-face mask: Unica.

2018

The new Driver and Partner wrist-mount diving computers arrive on the market, followed by Action and Action HR.

2019

SEAC opens a department dedicated to plastic molding of masks and fins at its San Colombano Certenoli plant.

2021

Now arriving to market, the new SCREEN scuba computer.

2022

the story continues on the following pages...

Headquarters in San Colombano Certenoli (Genova, Italy)
Over 10,000 m² of internal logistical area

Strict product safety and quality protocols
through both proprietary equipment and manual controls

Just two years after we inaugurated the new internal moulding department, the benefits are clear:

- A 50% reduction in plastic waste
- Reduction in the impact of transport
- Greater control over finished product quality
- Better in-stock availability

GOOD PLASTIC. ONLY WHERE IT'S NEEDED.

Starting with the fin shapers and the packaging for accessories like Bio Gel and neoprene adhesive, SEAC has begun replacing some plastic packaging with 100% recyclable cardboard.

This icon indicates that we have recently conducted a study on the fin in order to optimize its plastic materials. We at SEAC have undertaken this analysis to improve flexion and increase the elastic response from all fins produced in the San Colombano Certenoli location.

A full-page background image showing a scuba diver in the water. The diver is positioned in the lower center, looking towards the camera. Behind them is a large, craggy rock formation that rises out of the sea. The sky is blue with some white clouds. The water is a deep blue with visible ripples and reflections. The word "REGULATORS" is overlaid in a white semi-transparent box across the middle of the image.

ICE KIT DIAPHRAGM

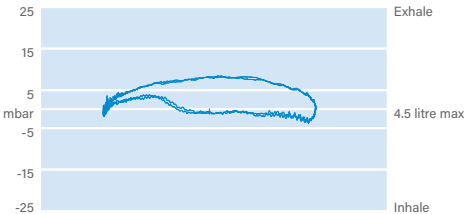

INT 230 BAR

DIN 300 BAR

Breathing effort at 50 msw and 50 bar: 0.63 J/l.

First Stage:

- Made of Sand-blasted forged brass.
- High-performance balanced diaphragm design:
The Intermediate Pressure is always constant during the dive at any depth.
- ICE Kit: fully isolates all moving parts from contact with the water, ensuring excellent thermal protection in cold water.
- Simple and fast maintenance.
- HP ports: 2
- LP ports: 4
- Replaceable stainless-steel Valve Seat: designed to offer great safety, it can be easily disassembled to make maintenance easy.

Second Stage:

- Made of technopolimers, elastomers, and metal componets.
- Front cover enhanced with rust-proofing and scratch-resistant Luxury Technology treatment.
- Adjustable breathing effort and Venturi effect.
- OWS System: the Cover is designed to prevent free flow even in strong currents.

MODULAR MAX

MADE IN ITALY

- EXTRA LIGHT: 3.1 KG (6.8 LB)
- IDEAL FOR DIVE TRAVELS
- 4 METAL D-RINGS
- CORDURA®
- LIFT: 20.0 KG (45 LB)
- 2 TRIM POCKETS INCLUDED
- FULLY MODULAR
- ADJUSTABLE HARNESS
- EN 1809:2014 + A1:2016

- SEAC Modular Max is the evolution of Modular, SEAC's rear-volume recreational BCD designed for use with dual tanks.
- Donut bladder with 44 lbs of lift in durable 1680 Denari Ballistic Nylon outside and internal air chamber in polyurethane. Features a piston inflator and two quick discharge valves arranged to make it possible to dump quickly from any position.
- Freely customizable: every part of the SEAC Modular Max BCD is interchangeable.
- You can simply and quickly adjust the structure of the BCD and find just the right buoyancy in any situation.
- Standard connections: the backpack for the SEAC Modular Max BCD can accommodate different bladders and backpacks thanks to its standard-gauge eyelets for fastening using straps and other fasteners. The padding prevents any irritation from clamps in contact with the back.
- Convenient for travel: SEAC Modular Max is the BCD that fits conveniently in your luggage, making it ideal for dive vacations.
- It disassembles quickly, takes up little space, and weighs just 6.8 lbs, so you can use your own BCD, set to just how you need it, even when you travel.
- The standard equipment for the Modular Max includes: harness with removable shoulder straps and soft backpack with removable steel core, 44 lbs dual donut bladder, 2 pockets with quick weight release, 4 anodized aluminum D-Rings, and waist buckle in stainless steel.

MADE IN ITALY

-  EXTRA LIGHT
-  IDEAL FOR DIVE TRAVELS
-  8 METAL D-RINGS
-  4 POCKETS INCLUDED
-  COMFORT FIT
-  LOW-DRAG DESIGN
-  EN 1809:2014 + A1:2016

2 WEIGHT POCKETS INCLUDED

2 TRIM WEIGHT POCKETS INCLUDED

- Ultra-practical harness: quick and easy to put on. Simply fasten the flat center buckle and adjust the front straps and shoulder straps.
- "Frame to back" system: the adjustments for the shoulder straps start directly from the backpack. The BCD won't warp, so the weight stays distributed correctly.
- Independent bladder: The bladder in the SEAC EQ-PRO "slides" along the harness completely independently. When inflated, the pocket area rests comfortably along your sides, so it won't squeeze your abdominal area.
- Functional, low-drag design: even more compact bladder and a contour designed to be more hydrodynamic. Handle inside the backpack, making it easy to transport.
- Excellent fit for men and women: 3D Mesh inserts wrap fully around the shoulder straps and prevent rubbing.
- Swivel buckles adapt the harness to the female body. Available in 5 sizes.
- Dry weight (size L): 7.7 lbs (including hose).
- Rear weight pockets standard (Trim Pocket).

NYLON SHEATH WITH
CARABINER AND BELT LOOP

STAINLESS STEEL

A full-page underwater photograph of a scuba diver. The diver is wearing a black wetsuit with red accents on the sleeves and fins, a black BCD with 'seat' written on the chest, a black mask with a red strap, and a black regulator. They are holding a bright dive light in their right hand. The background shows a rocky reef with green algae and blue water. A semi-transparent grey banner is overlaid on the left side of the image.

SPACE 7 MM

Feeling at ease during a dive is always a matter involving many different factors, most importantly, a comfortable wetsuit. For this reason, the Space has been developed in a warm, comfortable neoprene designed for proper stretch, regardless of body shape. Seac Space is available in many sizes, designed with specific cuts for both men and women. Donning is quick and easy even in non-optimal conditions like high temperature and high humidity. It is a one-piece wetsuit made of Ultrastretch neoprene and rear zip with inner flap to ensure a barrier against water leakage. Aquastop system on wrists and ankles are provided with double neoprene cones and zippers. SEAC Space has been designed to guarantee great freedom of movement in all conditions, thanks to the embossed inserts positioned on the inside of the elbows and behind the knees. Chest and shoulder areas, the most stressed equipment friction points, have been reinforced with geometric pattern design inserts. A rubber sleeve insert has been positioned on left wrist to firmly hold your dive computer. Seac Space is available in 5 or 7 mm neoprene.

Aquastop system on wrists and ankles are provided with double neoprene cones and zippers. SEAC Space has been designed to guarantee great freedom of movement in all conditions, thanks to the embossed inserts positioned on the inside of the elbows and behind the knees. Chest and shoulder areas, the most stressed equipment friction points, have been reinforced with geometric pattern design inserts. A rubber sleeve insert has been positioned on left wrist to firmly hold your dive computer. Seac Space is available in 5 or 7 mm neoprene.

GP100 S

MADE IN ITALY

- Blade material: high-performance technopolymer.
- Foot pocket material: thermoplastic elastomer.
- Sling Strap System.
- Weight (single fin): 2.16 lbs.
- Other features: non-slip covering on foot pocket sole.
- Elastomer coating on the blade to prevent wear and abrasions.
- Extremely durable fin, ideal military use and/or in extreme conditions.
- Negative fin promotes better posture by eliminating the positive thrust that in some cases can be created in the footpockets.

EQUIPAGE
1000

1000
LIT

A woman with long blonde hair, wearing a black one-shoulder bikini top and a shell necklace, is crouching on a wooden boat deck. She is looking towards the camera. In the background, several white sailboats are docked in a harbor under a clear blue sky. The text "BAGS AND ACCESSORIES" is overlaid in a white box on the right side of the image.

BAGS AND ACCESSORIES

The background of the image is a vibrant tropical scene. It features a clear blue sky with wispy white clouds. In the foreground, the turquoise water of a beach is visible. In the mid-ground, a small, rocky island with some greenery and a few buildings is seen. On the right side, a close-up of a black scuba diving mask with a green strap is partially visible, suggesting a diving theme.

FULL-FACE MASKS

seac

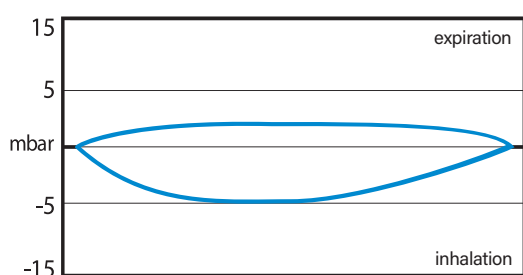

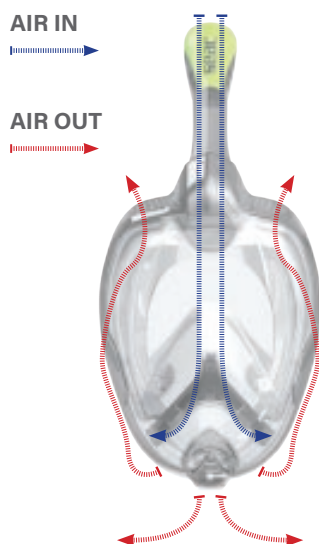

SNORKELING
2022

SECURITY CONTROLS

In the SEAC laboratories all the production batches of our full-face masks are tested with specific Ansti machines for measuring the dynamic performance of human respiration, and these tests are carried out using proprietary SEAC equipment which has been specifically developed to control of the levels of CO₂ present in the air inhaled through the masks during the breathing process. SEAC has developed a series of specific tests in compliance with the values required by the following European standards:

- EN 1972:2015 establishes the requirements for the design and production of snorkel tubes, limited to respiratory efforts;
- EN 16805:2015 establishes the requirements for the design and production of diving masks;
- EN 136:2000 establishes the minimum requirements for the production of full-face respiratory protection masks, limited to the control tests of CO₂ in the inhaled air;
- EN 250:2014 relating to compressed air self-contained breathing apparatus for open circuit underwater use and its components, limited to CO₂ control tests in the inhaled air.

A close-up photograph of a freediver's arm and hand. The diver is wearing a green and black camouflage wetsuit. On their wrist is a black digital dive watch with a black strap. The watch face is blue and displays '18' at the top, '24:6' in the center, and '7-31 TU' at the bottom. The diver's hand is resting on a black object, possibly a part of a scuba tank or regulator. The background is a clear blue sky.

SHUTTLE POWER

SHUTTLE POWER version is designed for the intermediate or expert swimmer who wants to achieve a complete work-out by improving speed, muscle and heart training by swimming faster and longer.

SHUTTLE POWER facilitates the training of thighs and buttocks muscles, calves and lumbar as well, as to increase the whole swimmer's resistance.

The advantage of using the new 100% silicone SHUTTLE is that this version guarantees an excellent kicking frequency by exploiting a movement that is extremely similar to the natural one.

EU SIZES	USA SIZES	TOTAL LENGTH mm / in
34/35	3 - 4	280 / 11.0
36/37	4 - 4 ½	293 / 11.5
37/38	4 ½ - 5 ½	308 / 12.1

43/44	9 ½ - 10	323 / 12.7
45/46	11 - 12	336 / 13.2

SHUTTLE SPORT

SHUTTLE SPORT version is addressed to beginner, or intermediate, level swimmer who instead is looking at an additional propeller while kicking.

SHUTTLE SPORT is the ideal support to strengthen thighs, buttocks, calves and lower back muscles.

The advantage of using the new 100% silicone SHUTTLE is that this unique model is granting an excellent kick frequency by exploiting a movement that is extremely similar to the natural one.

TEAM

- Small blade, full-foot fin, made in 3 materials.
- Excellent for snorkeling, and ideal for leg workouts in the pool.

MATE SWIM

PN

0920015000000A

BUDDY

- Low profile, hydrodynamic tube to reduce water resistance and facilitates breathing.
- Full control of freestyle stroke movement without any interruption derived by the lateral "breathing".
- Increases cardiovascular strength and lung capacity.
- Adjustable and lightweight headboard, with integrated pad, ensures a comfortable fit.
- Quick release on both sides.
- Silicone mouthpiece, reduces jaw fatigue to a minimum.
- Purge valve positioned to maximize compensation of excess water.

Quick release on both sides
