SHUTTLE POWER

(IT)

Il modello **SHUTTLE POWER** è ideato per il nuotatore di livello intermedio o esperto che desidera raggiungere un allenamento completo migliorando: velocità, allenamento muscolare e cardiaco nuotando più velocemente e più a lungo. La **SHUTTLE POWER** aiuta ad allenare i muscoli di cosce, glutei, polpacci e fascia lombare nonché ad aumentare la resistenza.

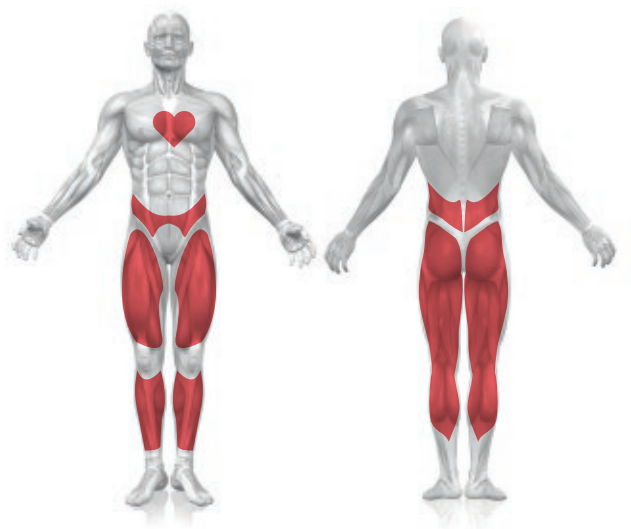

Il vantaggio dell'utilizzo della nuova SHUTTLE 100% silicone garantisce un'ottima frequenza di pinneggiata sfruttando un movimento estremamente simile a quello naturale.

(EN)

SHUTTLE POWER version is designed for the intermediate or expert swimmer who wants to achieve a complete work-out by improving speed, muscle and heart training by swimming faster and longer.

SHUTTLE POWER facilitates the training of thighs and buttocks muscles, calves and lumbar as well, as to increase the whole swimmer's resistance.

The advantage of using the new 100% silicone SHUTTLE is that this version guarantees an excellent kicking frequency by exploiting a movement that is extremely similar to the natural one.

TAGLIA SIZE	LUNGHEZZA TOTALE TOTAL LENGTH
34/35	280 mm
36/37	293 mm
37/38	308 mm
38/39	310 mm
40/41	313 mm
42/43	318 mm
43/44	323 mm
45/46	336 mm

SHUTTLE SPORT

(IT)

Il modello **SHUTTLE SPORT** è indicato per il nuotatore di livello principiante o intermedio che desidera avere un aiuto propulsore durante la pinneggiata. La **SHUTTLE SPORT** aiuta a rafforzare i muscoli di cosce, glutei, polpacci e fascia lombare.

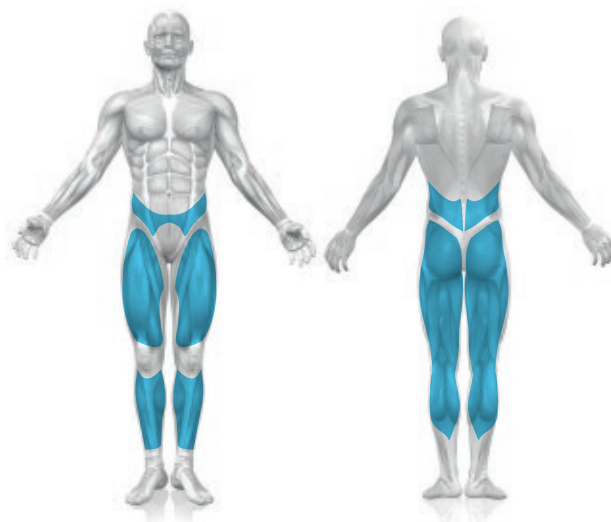

Il vantaggio dell'utilizzo della nuova SHUTTLE 100% silicone garantisce un'ottima frequenza di pinneggiata sfruttando un movimento estremamente simile a quello naturale.

(EN)

SHUTTLE SPORT version is addressed to beginner, or intermediate, level swimmer who instead is looking at an additional propeller while kicking.

SHUTTLE SPORT is the ideal support to strengthen thighs, buttocks, calves and lower back muscles.

The advantage of using the new 100% silicone SHUTTLE it that this unique model is granting an excellent kick frequency by exploiting a movement that is extremely similar to the natural one.

BUDDY

- (IT)**
- Basso profilo, tubo idrodinamico che riduce la frizione e facilita la respirazione.
 - Facile controllo del movimento della bracciata nello stile libero senza interruzione per la respirazione laterale.
 - Aumenta la forza cardiovascolare e la capacità polmonare.
 - Staffa Regolabile e leggera, con cuscinetto integrato, garantisce una calzata confortevole.
 - Sgancio rapido su entrambi i lati.
 - Boccaglio in silicone, riduce al minimo l'affaticamento della mandibola.
 - Valvola di spurgo posizionata per massimizzare la compensazione di acqua in eccesso.
- (EN)**
- Low profile, hydrodynamic tube to reduce water resistance and facilitates breathing.
 - Full control of freestyle stroke movement without any interruption derived by the lateral "breathing".
 - Increases cardiovascular strength and lung capacity.
 - Adjustable and lightweight headboard, with integrated pad, ensures a comfortable fit.
 - Quick release on both sides.
 - Silicone mouthpiece, reduces jaw fatigue to a minimum.
 - Purge valve positioned to maximize compensation of excess water.

Sgancio rapido su entrambi i lati
Quick release on both sides

MASCHERE FULL-FACE
FULL-FACE MASKS

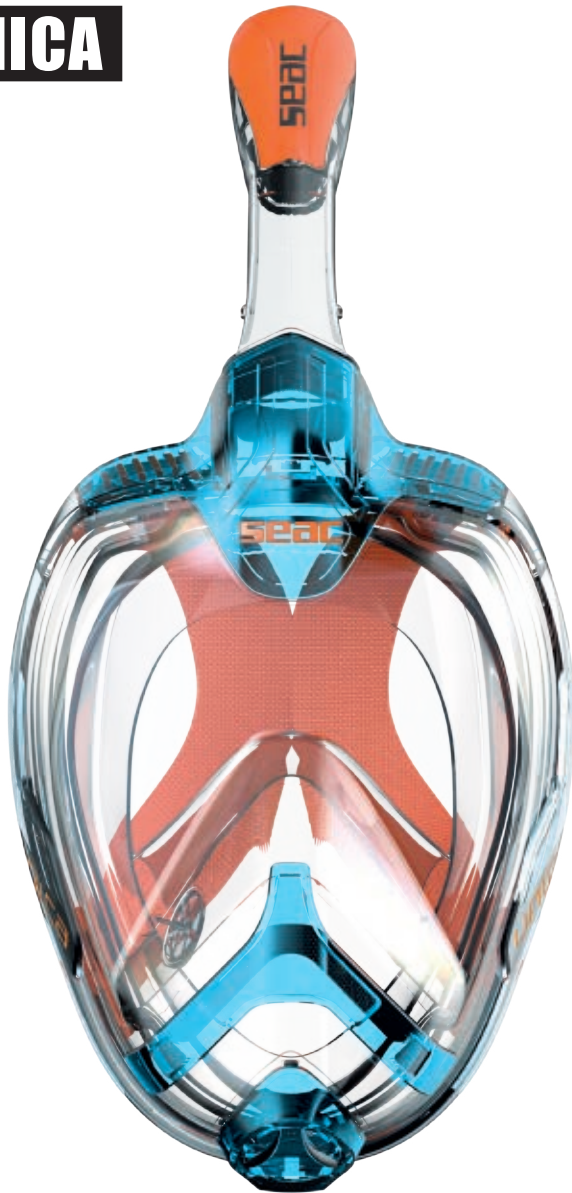

CONTROLLI DI SICUREZZA | SECURITY CONTROLS

- (IT)** Nei laboratori SEAC® i lotti di full face mask vengono testati con macchinari Ansti specifici per la misurazione delle performance dinamiche della respirazione umana e con apparecchiature proprietarie SEAC® per il controllo del livello di CO₂ presente nell'aria inspirata attraverso le maschere. SEAC® ha sviluppato una serie di test specifici attenendosi ai valori previsti dalle seguenti normative europee:
 EN 1972:2015 stabilisce i requisiti per la progettazione e produzione di tubi snorkel, limitatamente ai sforzi respiratori;
 EN 16805:2015 stabilisce i requisiti per la progettazione e produzione di maschere per la subacquea;
 EN 136:2000 stabilisce i requisiti minimi per la produzione di maschere intere di protezione respiratoria, limitatamente ai test di controllo della CO₂ nell'aria inspirata;
 EN 250:2014 relativa agli autorespiratori per uso subacqueo a circuito aperto ad aria compressa e ai suoi componenti, limitatamente ai test di controllo della CO₂ nell'aria inspirata.
- (EN)** In SEAC® laboratories all production batches of our full-face masks are singularly tested with specific Ansti machines to measure the dynamic performance of respiration. These tests are carried out using proprietary SEAC® equipment which has been specifically developed to control CO₂ levels present in the air inhaled into the masks during the breathing process. SEAC® has developed a series of specific tests in compliance with the values required by the following European standards:
 EN 1972:2015 establishes the requirements for the design and production of snorkel tubes, limited to respiratory efforts;
 EN 16805:2015 establishes the requirements for the design and production of diving masks;
 EN 136:2000 establishes the minimum requirements for the production of full respiratory protection masks, limited to the control tests of CO₂ in the inhaled air;
 EN 250:2014 relating to compressed air self-contained breathing apparatus for open circuit underwater use and its components, limited to CO₂ control tests in the inhaled air.
